<b>What is the most urgent problem facing your jurisdiction?</b>	<i>The greatest challenge is to recognize the changing demographics in Fairfax County and adjust the instruction to ensure that all children have a solid foundation of basic skills in reading, writing and mathematics prior to being moved through the system and to accomplish this while addressing the academic needs across the spectrum of academic capabilities.</i>
<b>Why should voters elect you?</b>	<i>I have consistently represented the interests of the voters to the school system and held the school system accountable to the needs of the community.</i>
<b>What is your plan to address the traffic problems in Virginia?</b>	<i>As a part of the transportation re-engineering, the impacts on traffic flow due to the number of busses, duration of bus runs and time of day that busses are picking up students should be considered.</i>
<b>Which describes what you think about current policies governing growth and development in your area?</b>	<i>not restrictive enough</i>
